RADAR Scan Pattern synthesis and implementation on FPGA

3 Raster Scan The two scan types described above search only in azimuth but the raster scan searches both in azimuth and elevation Fig 3 The radar scans a specific angular sector in azimuth and increments its elevation after completing

the sector similar to the raster scan on TV screens There can be several elevation levels Figure 3

Raster Scanning an overview ScienceDirect Topics

Rapid raster scanned CW imaging systems have also been developed In one such implementation a 0.2 THz Gunn diode source and Schottky diode detector [93] could raster scan an object at a 512 pixels per second acquisition rate The advantages of pulsed THz TDS compared to CW imaging is that broad spectral information 0–3 THz can be acquired from a single picosecond THz pulse as well as
